

# FUSION MIDDLEWARE SERVICES

## *Data Intensity's Fusion implementation experts can help you gain peak benefits from Oracle-based applications*

For your business to thrive, you need flexible, on-demand access to information. Gaining this level of insight – and this degree of efficiency in your business processes – is complicated by information often originating from diverse sources. If your data is hard to assemble and isolated in silos, you are missing much of its value and losing opportunities to gain insight, act fast and control costs.

Oracle Fusion Middleware provides a powerful platform for simplifying IT infrastructure, delivering innovative applications and streamlining access across data platforms and data sources. With applications running in the Oracle environment, you gain a competitive edge through increased business agility.

### Data Intensity Can Help You Get Results Fast

When you are looking for powerful, well-integrated applications to give your business advantages in agility, innovation, and cost-effectiveness, Data Intensity can partner with you through all phases. Our global team of business and technology consultants has the in-depth industry knowledge and experience to help you rapidly gain the advantages of point-in-time solutions for you to run powerful and robust applications. We offer with these services:

#### Design

- Data Intensity's experts work with you to define goals and requirements for robust, scalable and highly available solutions that deliver business results and integrate your business processes.
- We design the architecture and write technical specifications and a development project plan.

#### Implementation

- Data Intensity's experienced staff delivers custom implementations on-time and on-budget.
- Our technical teams have deep experience in provisioning flexible, secure and integrated solutions based on Service-Oriented Architecture (SOA), Oracle Service Bus (OSB), Oracle Application Development Framework (ADF), WebCenter and Oracle Identity and Access Management (OIAM).

#### Upgrades

- Data Intensity can manage the process and implementation for all Oracle software upgrades.
- We ensure seamless transitions for Oracle-based applications affected by upgrades.

#### Operations

- Data Intensity can manage your application infrastructure stack from top to bottom.
- We are dedicated to your needs for availability and performance.
- Experts at developing integrated solutions with Oracle SOA Suite, SOA Gateway, EBS, Legacy Applications, Webservices and disparate ERPs, databases and reporting solutions.
- We deliver scalable and resilient environments, ensuring the highest availability of business applications.

#### Performance Tuning

- Data Intensity can ensure that your application environment operates at peak performance by assessing bottlenecks and other performance characteristics with regular health checks.
- While assessing and improving performance, we can identify opportunities for continual improvement.

## Why Data Intensity

### *We measure our success by the value that we create for our customers*

Data Intensity is your partner in designing, implementing, upgrading and supporting Oracle-based applications. Our expertise has allowed us to develop best practices, methodologies and monitoring, and encompasses all areas related to Oracle Fusion Middleware.

Our customers turn to us because they trust us to provide superior, timely results. They know we are:

- **Cost-effective**  
With Data Intensity, you get better skills and experience than a large organization without the big price tag.
- **Experienced**  
Data Intensity has been providing technical expertise for 15 years. We are the largest privately held Oracle cloud services company in the world.
- **Easy to work with**  
Data Intensity is deep in expertise, but lean in bureaucracy. You are always a priority to us with our CustomerFirst™ approach.
- **Always with you**  
We provide 24/7 support so you don't have to worry about the availability and performance of your critical applications.
- **Flexible**  
We offer multiple pricing models, including fixed-fee agreements for cost predictability or the flexibility of time and materials engagements.

### About Data Intensity

Data Intensity is the leading independent provider of managed and cloud consulting services for enterprise databases, applications, business intelligence solutions and analytics. The company combines best-of-category technology, world-class services, a flexible business model, and deep-rooted expertise gained from hundreds of successful deployments. Our mission is to cost-effectively support the full scope of a customer's enterprise data lifecycle. [Contact us](#) for more information. Copyright © 2016 Data Intensity, LLC. All Rights Reserved.
