

# GET MORE BENEFITS FROM THE CLOUD

## Cloud Solutions Tailored to Your Needs

Cloud adoption delivers significant advantages for your organization's agility and bottom line. But the cloud is not a single, one-size-fits-all decision. Adopting a made-to-order cloud environment delivers the greatest gain from these returns:

- Improved scalability
- Guaranteed data recovery
- Better performance
- Increased flexibility
- Predictable monthly costs and no CapEx
- Elimination of time-consuming and disruptive software upgrades
- Continuous innovation

For both infrastructure and applications, you can choose any combination of cloud solutions: private, public (AWS, Oracle, Microsoft Azure), hybrid and SaaS. To achieve the best outcomes from incorporating multifaceted cloud technology, your plan should be designed in alignment with your organization's needs and objectives – and that means each organization needs to chart its own path to Oracle Cloud – applications, platform and infrastructure.

## Mapping Your Cloud Journey

Because cloud adoption is a complex, multi-stage initiative, IT experts recommend a process that includes formal requirements gathering, cost-to-benefit assessment and roadmap development before implementation. Best practices for strategic cloud, PaaS and SaaS adoption also include a commitment to regularly measuring and evaluating against goals and resources.

Planning and implementing multi-tiered cloud models demands significant expertise. You'll save time and money by relying on experts with experience in the complexity of cloud adoption and who can work alongside your IT staff.

## Why Data Intensity

With more than 150 consultants that can help you define the cloud delivery model that best meets your goals for an automated, self-provisioning and dynamic infrastructure that scales on demand – while staying within budget. Data Intensity starts with an assessment that helps uncover, prioritize and build a roadmap for migration opportunities that align with your technology and budget goals. Using this roadmap, Data Intensity can help you implement and update your plan throughout your cloud adoption journey.

Data Intensity is a platinum Oracle partner with deep experience with the Oracle Cloud Infrastructure (OCI), Oracle E-Business Suite and Oracle Cloud Applications as well as Lifecycle Assurance for Oracle Cloud Applications. Our complete portfolio of managed and professional services enable you to take advantage of best practices and our experience with more than 200 cloud Application Unlimited migrations (on-premises, private cloud, public cloud).

- Oracle Cloud Infrastructure Partner-of-the -Year (UK) 2017

#### PLATFORM AGNOSTIC:

Oracle Public Cloud, Amazon (AWS), Microsoft Azure

## Oracle Cloud Infrastructure and Public Cloud (OCI/OPC) Services

Data Intensity is Specialized in OCI/OPC including Infrastructure-as-a-Service, Platform-as-a-Service, Oracle Business Intelligence and Oracle Integration Cloud. We offer deep infrastructure expertise to help overcome the unique challenges you face in your cloud journey. Our team helps you assess, design, and implement your path to the Oracle Cloud and can provide ongoing support once you get there. Data Intensity's services include:

- Determining the cloud options that make sense economically and strategically
- Creating a robust identity and security model
- Developing orchestration processes for resource deployment
- Managing and right-sizing resources and costs
- Integrating OCI and OPC with other on-premises and cloud solutions
- Managing your OCI/OPC platform

As the only platform-agnostic provider, Data Intensity gives you an unbiased assessment of your best path forward with cloud adoption. Our approach removes the Public Cloud complexity by tailoring managed and professional services for a wide range of Oracle Cloud Services, including Oracle Cloud Infrastructure/ Public Cloud (OCI/OPC), Oracle applications and hybrid solutions. We are the leader in Oracle Specializations and have helped hundreds of organizations build, implement and support the cloud roadmap that aligns with their business today and into the future.

## Oracle Cloud Application Services

Our consultants provide assessment, implementation, upgrade, and support services for Oracle Financials Cloud, Oracle Procurement Cloud, and Oracle Supply Chain Cloud. Our expertise extends into Oracle Cloud Security, Oracle Cloud Reporting, Oracle Cloud Data, and Oracle Cloud User Experience. Our services include:

- Feasibility, gap analysis, and TCO associated with a move from on-premises to cloud applications
- Implementation of Oracle Cloud Applications
- Integration of Oracle Cloud Applications with other SaaS and/or on-premises solutions
- Co-existence strategy for on-premises Applications Unlimited with Oracle Cloud Applications
- Upgrades of Oracle Cloud Applications
- Development of CEMLLs and custom applications
- Quick Start Programs

We are the only provider that is platform-agnostic and will give you an assessment of whether a move to the cloud is right for you.

## Lifecycle Assurance for Oracle Cloud Applications

Once your cloud implementation is up and running, Data Intensity can help you manage it efficiently and cost-effectively. One of the most challenging and unanticipated aspects of running SaaS solutions is keeping up with annual upgrades and monthly patching cycles. Data Intensity's Lifecycle Assurance for Oracle Cloud Applications Service provides the ongoing management needed to ensure you stay up-to-date:

- Ongoing business process analysis for new patches and releases
- Updates to training materials and documentation
- Maintenance and execution of test scripts
- Management, break-fix, and enhancements of CEMLLs

Our Functional Service Desk acts as an extension of your team and works directly with users to ensure they are informed of the frequent changes and advances in functionality. By providing an economical way to execute test scripts, update training, develop code, and document business processes, you can focus on strategic goals.

## We Can Help You in Your Cloud Journey

To achieve the highest return-on-investment from the cloud, you need the right resources to help plan and implement your roadmap for your organization's future. Contact Data Intensity for more information about how we can help you develop a strategy and roadmap for moving all or some of your IT applications and systems to the cloud.
