

CLOUDSPRAWL MANAGEMENT AS-A-SERVICE (CSMaaS)

There's a good reason why the SaaS application market is the fastest growing cloud market segment. SaaS delivered applications deliver near instantaneous functionality for line of business users to automate functional business processes. This democratization of cloud consumption delivers an obvious time-to-benefit improvement for business users but also bears a new set of challenges related to change and integration management with core systems of record. At Data Intensity, we refer to this as the Cloud Sprawl Management syndrome defined by symptomatic issues such as:

- ☒ Growing use of SaaS technology without governance
- § Growing dependency on Systems of Record drives greater need for expansive integrations
- § Managing Customized Application Code
- § Resolving unique business process challenges with little documentation
- § Inability to maintain Test Center of Excellence resourcing

Business Challenges:

Why CSaaS?

Although SaaS application and cloud sprawl is an extremely mature consumption model for most organizations, the challenges that most organizations face is a growing shortage of tools management expertise, test service management discipline and/or subject matter expertise all of which can have a dramatic impact when trying to maintain governance, business process continuity and usability of technology to best serve the business. Put simply, how are you able to manage the vendor change events outside of your control.

Data Intensity's global resource team is deeply skilled in Functional Application Testing, Integration technologies and popular SaaS Application platforms can be tailored to meet the most demanding Application Test Center of Excellence needs. Data Intensity provides a tailored Cloud Sprawl Management subscription based upon cataloging your critical application needs of your vendor managed change event schedules, matched against a deep CEMLI analysis to baseline your estate. Our two primary pillars of the Data Intensity Cloud Sprawl Management-as-a-Service portfolio include:

- SaaS Test Assurance Services
 - Vendor Implemented Change Events
 - Code & Customization Updates
 - Testing Platform
 - Release & Test Cycle Management
 - Script Library Management
 - Test Execution Reporting & Remediation Plans

- Cloud Integration Management
 - Data Integration Consistency
 - Business Process Workflow
 - Application & Business Process Mapping

Data Intensity is a Global Oracle Platinum and Microsoft Gold Partner with more than 20 years of experience managing Oracle workloads both on-premise and in the cloud (public and private).
