ADVANCING ORACLE E-BUSINESS SUITE EFFECTIVENESS

Ready Expertise and Access

Oracle E-Business Suite (EBS) is designed to deliver boosted productivity and operational efficiency to your business. EBS management and performance tuning, therefore, are vital to keeping your business-critical systems running optimally. Identifying issues can be difficult, however, without ready EBS expertise and access to the data and analytics you need.

About Enginatics

Enginatics provides software for EBS reporting and analytics, with a focus on user experience and efficiency. Blitz Report™ is embedded into the EBS application and helps users to organize and export real-time data directly to Microsoft Excel. Business users can choose from hundreds of ready to use reports and create layout templates in their desired format. IT Teams can easily migrate reports from existing solutions such as Oracle Discoverer, Microsoft BI Publisher and others, or create new custom reports.

About Data Intensity

Data Intensity is an industry-leading Oracle Managed Services Provider delivering world-class expert managed services for the complex lifecycle of Oracle-powered workloads. Data Intensity provides full-stack, SLA-backed, technical and functional application managed services on any cloud. Everything we do – effective license position assessments, migrations services, 24x7 technical operational managed services, functional adaptation of EBS – is designed to optimally power your business.

Our Alliance Partnership

Together, Data Intensity and Enginatics boost EBS performance and reporting effectiveness, providing EBS users with the expertise and data they need. With over 20 years of tested success in optimizing EBS systems, Data Intensity and Enginatics...two leading Oracle partners...are your preferred powerhouse EBS partners.
