

CASE STUDY

Global Logistics Provider Maximizes Flexibility and Budget with Microsoft Azure Cloud

Introduction

Cory Brothers is a leading logistics and maritime service provider, offering a seamless solution for all transportation needs. Established in the mid-1800s, the company has seen solid, continuous growth, based on shipping and customer service expertise and experience developed across three centuries.

Their web-based software application, ShipTrak, enables customers to access all the essential vessel operations information they need, wherever they are, at any time. Developed in-house at Cory Brothers and designed to help monitor vessel operations across the world, ShipTrak has been made available to Cory Brothers' customers as well, to ensure that vital information and updates they need are at their fingertips, 24x7.

Client Challenges

Cory Brothers Shipping engaged Data Intensity to plan and carry out the migration of their ShipTrak application environments from legacy on-premise Oracle servers to the Microsoft Azure Cloud Services platform.

The ShipTrak environment stack comprised Weblogic 10.3.30 and Oracle Database 11.2.0.1 running on Windows Server 2008R2. Production, dev/test, and customer demo environments also needed to be migrated.

As part of Data Intensity's cloud optimization strategy, the associated components were also upgraded to the supported versions of WebLogic, Oracle Database, and Windows Server as part of the migration.

Customer Outcomes

Data Intensity provided highly skilled resources to Cory Brothers, which included full-stack Oracle expertise and Azure architects, guaranteeing a seamless migration to the cloud.

Moving to Azure with Data Intensity has enabled Cory Brothers Shipping to leverage the agility and security afforded by the platform, enabling them to meet the ever-growing demands of their customers.

"From start to finish, Data Intensity was highly professional; the design phase through to go-live ran smoothly and efficiently. A deep knowledge of both Oracle and Azure enabled the project to be successful."

**– Alan Horne
Team Lead, Cory Brothers**

About Data Intensity

Data Intensity is an Oracle Strategic MSP and Microsoft Gold partner delivering managed services for the complex lifecycle of Oracle-powered workloads. Offering a complete portfolio under one roof, we provide full-stack, technical, and functional application managed services on any cloud.

Additionally, we maximize and future-proof our clients' Oracle investments through effective license position assessments and cloud-independent migration services. Learn more at www.dataintensity.com.
