

# Oracle License Management

Ensure Oracle license compliance and identify optimization opportunities

## Achieve Compliance

When it comes to software ownership, a vendor's licensing policies, entitlements, and license inventories can easily get out of control, which is a legal and financial risk to your business. Enterprise software – particularly Oracle software – is in a completely different class, given its ease of deployment and oft-misunderstood licensing policies. Ensuring that Oracle compliance is continually reviewed is vitally important to avoid unnecessary and unbudgeted cost.

As more processes and applications shift to the cloud, it is critical to understand how your shifts in technology acquisition on-premises to services-based consumption models can take advantage of assets you may already be entitled to consume.

## Benefit from our Experience

We rely on proprietary tools which discover Oracle software assets and many years of experience in Oracle software licensing and asset management to create a baseline. We also review the customer's processes for deploying and retiring software licenses, and make recommendations on implementing an approach that virtually eliminates license waste. We offer both one-time services and an ongoing Licensing-Management-as-a-Service subscription.

## Lower TCO & Faster ROI

We know Oracle licensing inside and out, and leverage our experience to simplify things for you, your team, and your budget. We help clients produce analysis on their total cost of ownership (TCO) and return on investment (ROI) to proactively manage and stabilize their license spend.

Got a new project? Acquiring a new company? Let us help you provide the data required to justify spend. Want to charge back licensing to individual departments? We can help.

We've helped customers manage over \$2 Billion USD in software and hardware assets to ensure proper Oracle licensing compliance and cost optimization over the last 15 years.

## About Data Intensity

Data Intensity is an Oracle Strategic MSP partner delivering managed services for the complex lifecycle of Oracle-powered workloads. Offering a complete portfolio under one roof, we provide full-stack, technical, and functional application managed services on any cloud.

Additionally, we maximize and future-proof our clients' Oracle investments through effective license position assessments and cloud-independent migration services. Learn more at [www.dataintensity.com](http://www.dataintensity.com).
