

Security Operations Center as a Service

Comprehensive Protection Across Your Environment

Data Intensity's SOC as a Service (SOCaaS) delivers 24x7 threat monitoring, detection, and response across your entire IT landscape. Powered by best-in-class SIEM/SOAR technologies and Data Intensity's deep expertise in cloud, Oracle, and mission-critical enterprise workloads, our service strengthens your security posture while reducing the operational burden on internal teams.

Why SOC as a Service?

Modern enterprises face escalating cyber threats and increasingly complex environments. A fully managed SOC helps you:

- +** **Reduce risk.** Threat monitoring & correlation across on-prem, cloud, and hybrid systems.
- +** **Improve detection & response times.** Automated triage, alerting, and incident workflows accelerate security operations.
- +** **Meet compliance objectives.** Centralized logging, reporting, and clear audit-ready documentation.
- +** **Increase visibility.** Gain insights into user behavior, anomalies, system changes, and privileged activity.
- +** **Lower operational overhead.** Remove the complexity and cost of staffing, tooling, and providing true 24x7 coverage.
- +** **Scale effortlessly.** Added flexibility as your cloud footprint, environments, and applications grow.

What's Included

Threat Monitoring & Detection

- Real-time log collection, correlation, and threat intelligence
- Behavioral analytics to identify anomalies and bad actors

Incident Response & Automation

- Automated triage and response through pre-designed SOAR playbook
- Escalation to security analysts for high severity alerts
- Root cause analysis and remediation guidance

Compliance, Reporting & Governance

- Centralized dashboards and audit-ready reporting
- Support for PCI, HIPAA, SOX, GDPR, and industry specific requirements

Platform Management & Optimization

- Continuous tuning of alerts, rules, and use cases
- Integration with cloud services, firewalls, platforms, and endpoint tools

About Data Intensity

Data Intensity is an Oracle Strategic MSP delivering managed services for the complex lifecycle of Oracle-powered workloads. Offering a complete portfolio under one roof, we provide full-stack, technical, and functional application managed services on any cloud. Learn more at www.dataintensity.com.
